

All docs required to download:

Env: all parts

Finals (anything that includes it): all three parts

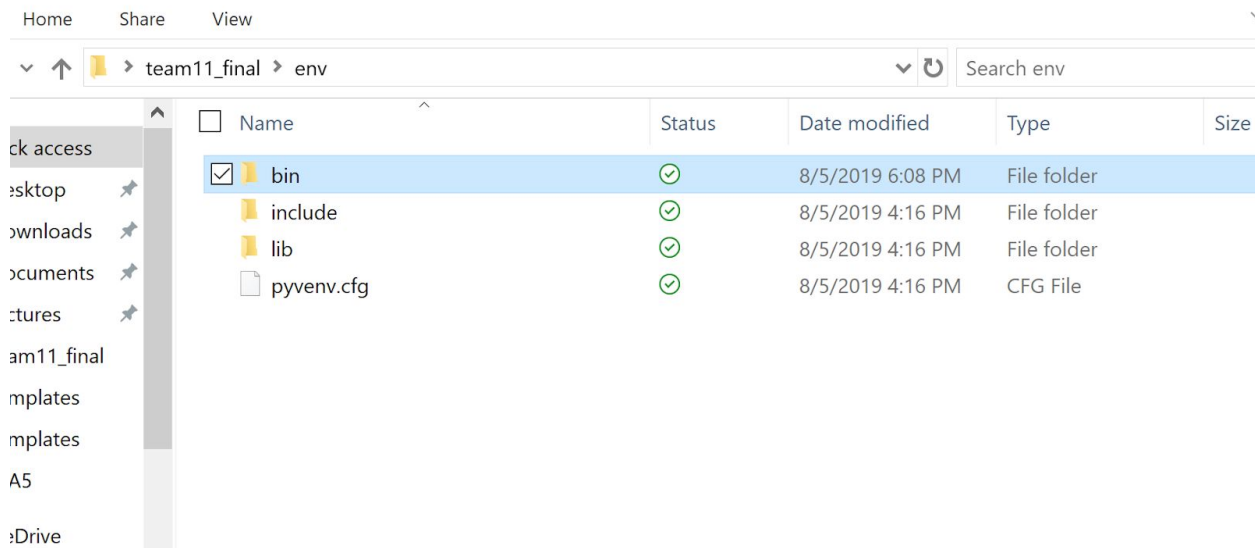

Scipy: all parts

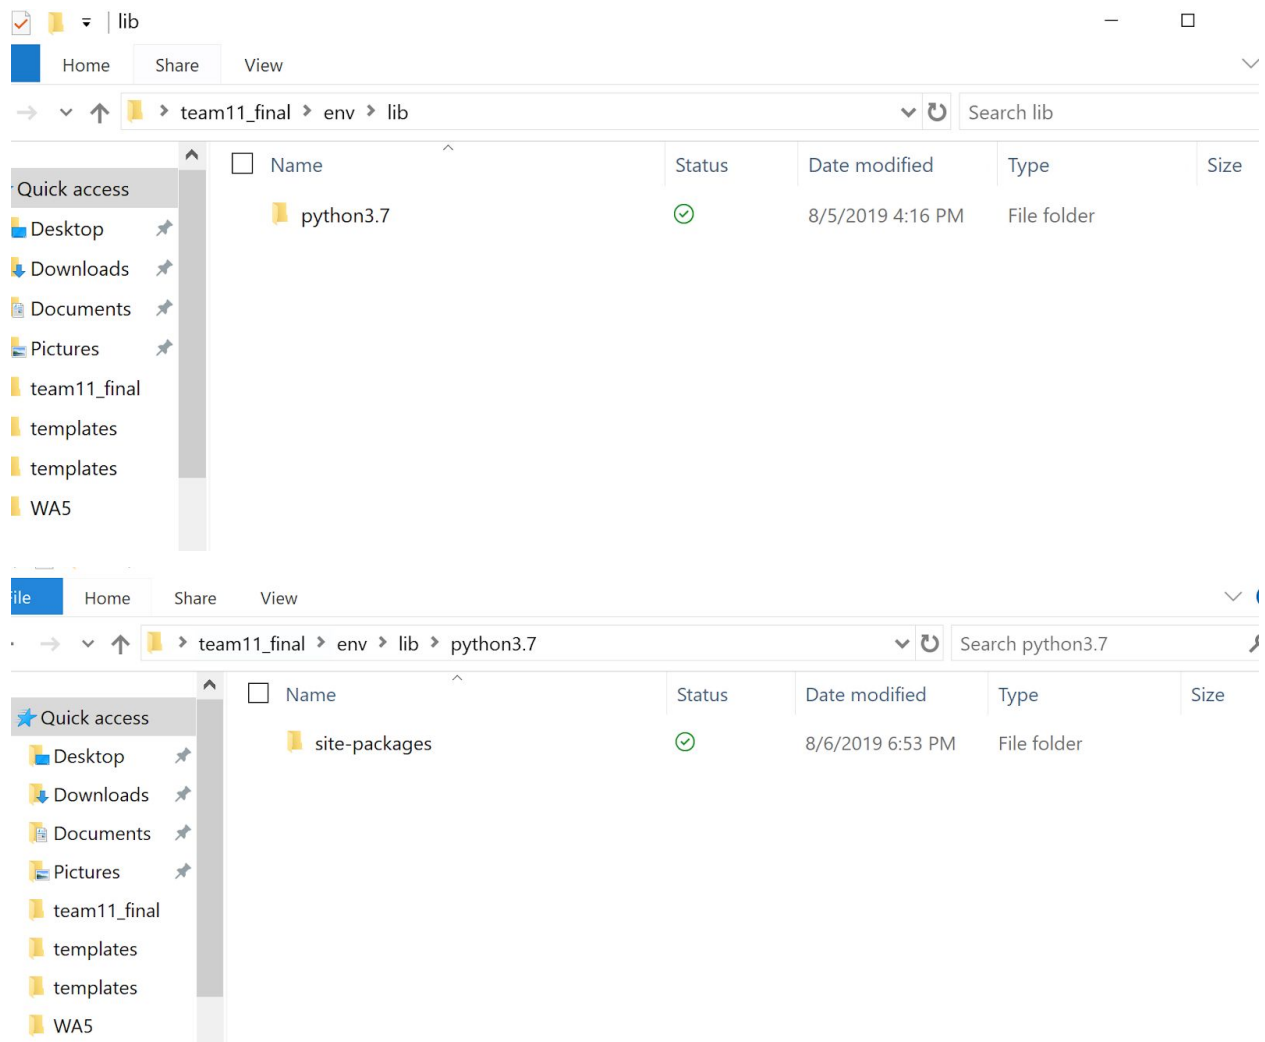

Create a folder of all of the docs and make it look like this:

With all of the miscellaneous files below.

In the env folder, create following structures:

Then, create two folders named `scipy` and `scipy-1.3.0.dist-info` to contain all of the components from `scipy` folder.
